1. How many and what proportion of the 27 songs have a length between 2 and 3 minutes?

2. What shape does this distribution have?

3. In which year (1978 or 2003) did tourists generally have to wait less long for the next eruption?

4. In which year (1978 or 2003) was the waiting time until the next eruption less variable?

5. Describe an aspect of the shape of the distribution that was apparent in 1978 but not in 2003.
