

## Downloading Minitab 15

Minitab, version 15 is available for free (for the PC) from your my.calpoly account.

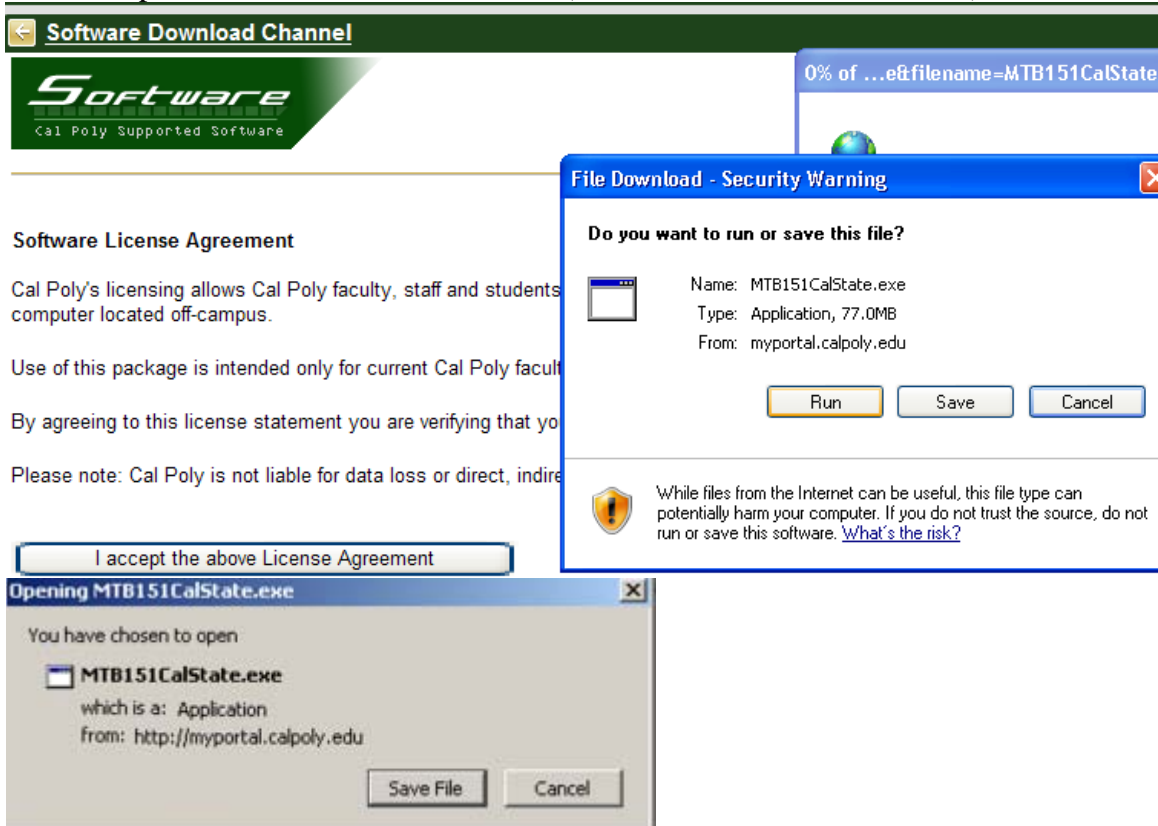

1) From my.calpoly.edu, click on the Technology tab. Scroll down to the Software Download Channel and select Windows. Here you should see “Minitab 15.1” listed. Click **Download** (the second line).

The screenshot shows a web page titled "Software Download Channel" with a green header. Below the header is a "Software" logo and the text "Cal Poly Supported Software". A "Windows" folder icon is visible. Two software items are listed:

- KeyServer Access Client v6.1**  
Download (2 MB)  
Local client for KeyServer services
- Minitab 15.1**  
Download (51 MB)  
Statistical analysis software

2) Accept the License Agreement. In Internet Explorer, you can click Run or click Save and then open the file in the saved location (or Save File in Mozilla Firefox).

The screenshot shows the "Software License Agreement" page. A "File Download - Security Warning" dialog box is overlaid, asking "Do you want to run or save this file?". The dialog box displays the following information:

- Name: MTB151CalState.exe
- Type: Application, 77.0MB
- From: myportal.calpoly.edu

Buttons for "Run", "Save", and "Cancel" are visible. Below the dialog box, a "File Download" progress bar shows "0% of ...e&filename=MTB151CalState".

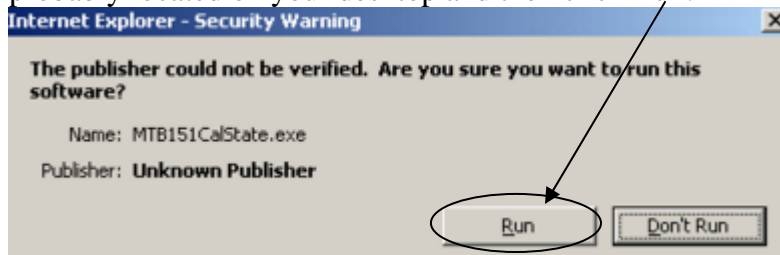

Below the license agreement, a button reads "I accept the above License Agreement".

An "Opening MTB151CalState.exe" dialog box is also overlaid, showing:

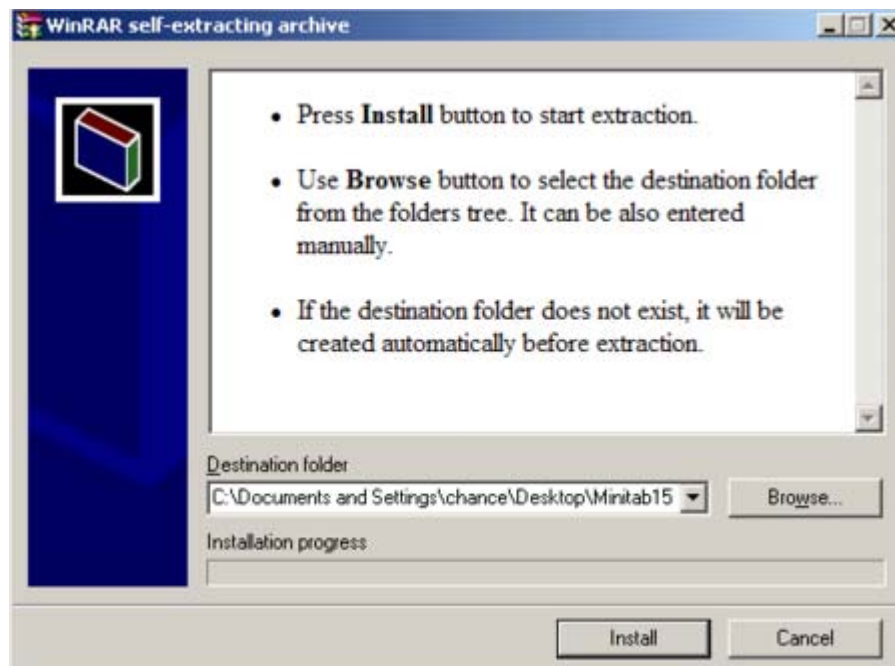

- You have chosen to open
- MTB151CalState.exe
- which is a: Application
- from: http://myportal.calpoly.edu

Buttons for "Save File" and "Cancel" are visible.

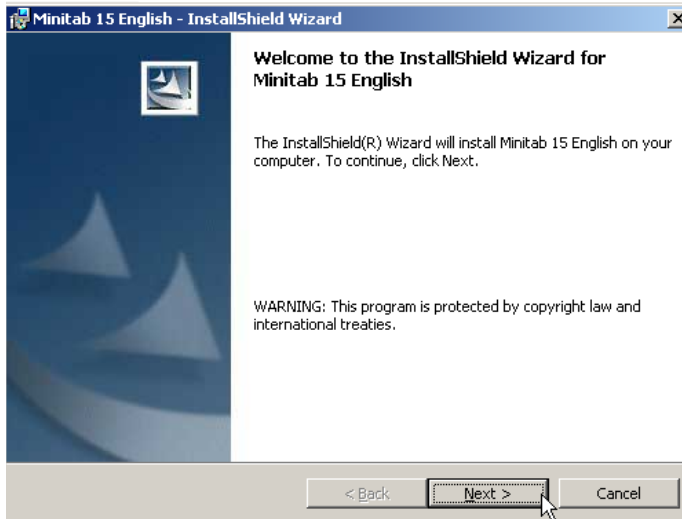

3) It *should* take 3 or 4 minutes to download. If you clicked Run, you may also have select Run again to verify the publisher or if you saved the file you can now double click on the executable file (MTB151CalState.exe) probably located on your desktop and then click Run.

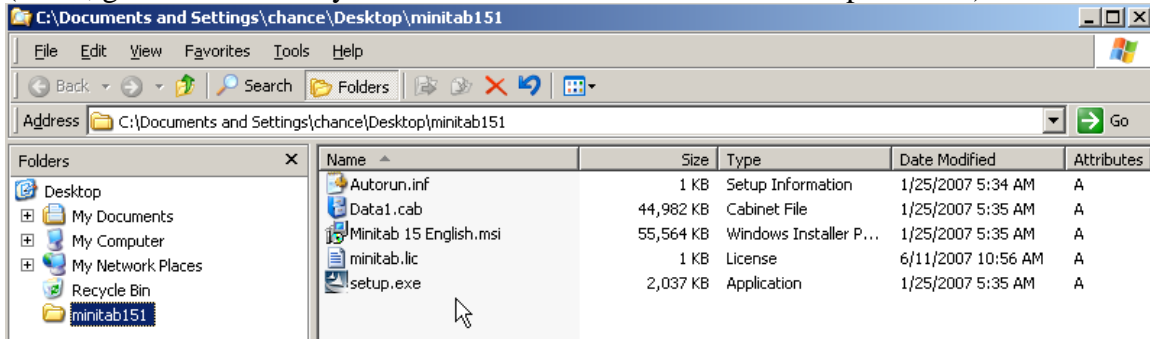

4) Next the files are going to self-extract into a (Destination) folder. It's not crucial where this folder is located, but you should keep track of where it is. It may be easiest to put it on your Desktop by pressing the Browse button and then selecting Desktop from the pull down menu (and typing on the Minitab15 part). Press Install.

5) The InstallShield Wizard for Minitab 15 should start automatically.

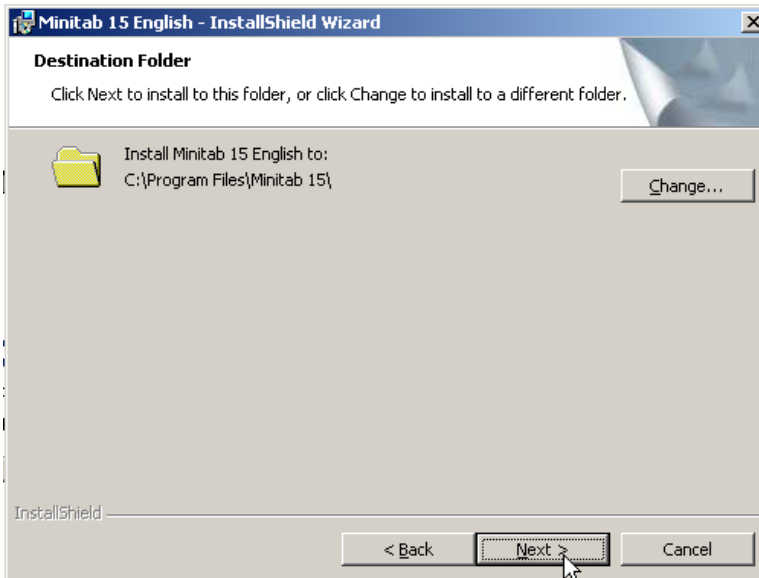

(If not, go into the folder you created and double click on the setup.exe file.)

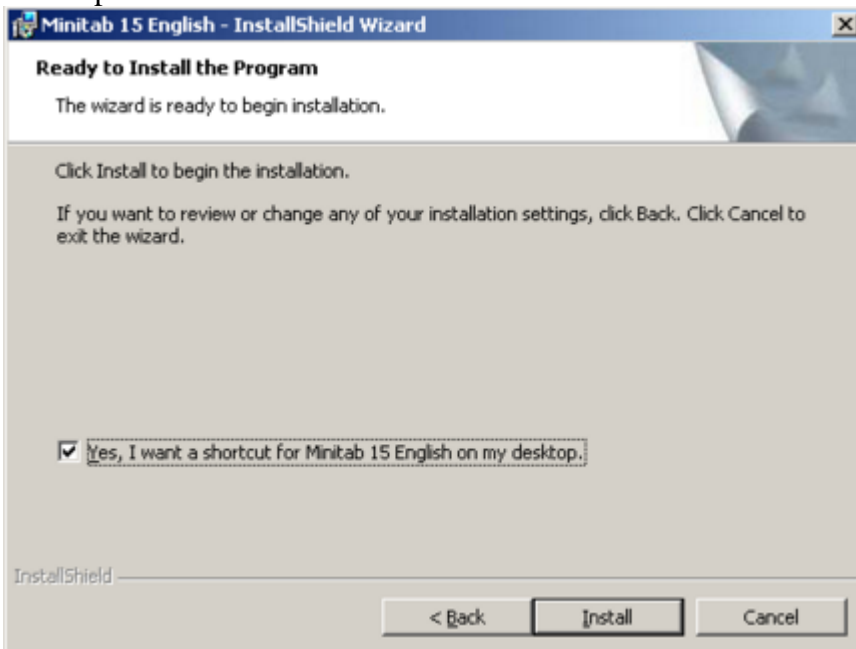

6) Click Next, then click the YES, I accept the terms in the license agreement button, then click Next again.

7) I recommend placing this Minitab 15 folder into your Program Files folder so just click Next again.

8) I recommend selecting the option to put a shortcut icon for Minitab 15 on your Desktop. So check that box and then click Install.

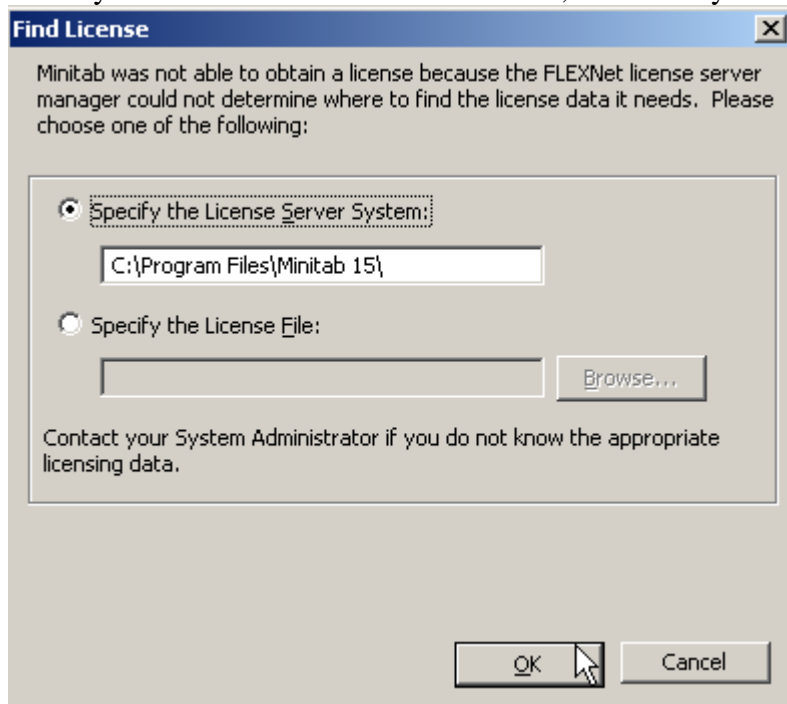

A few minutes will pass again. When prompted, click Finish.

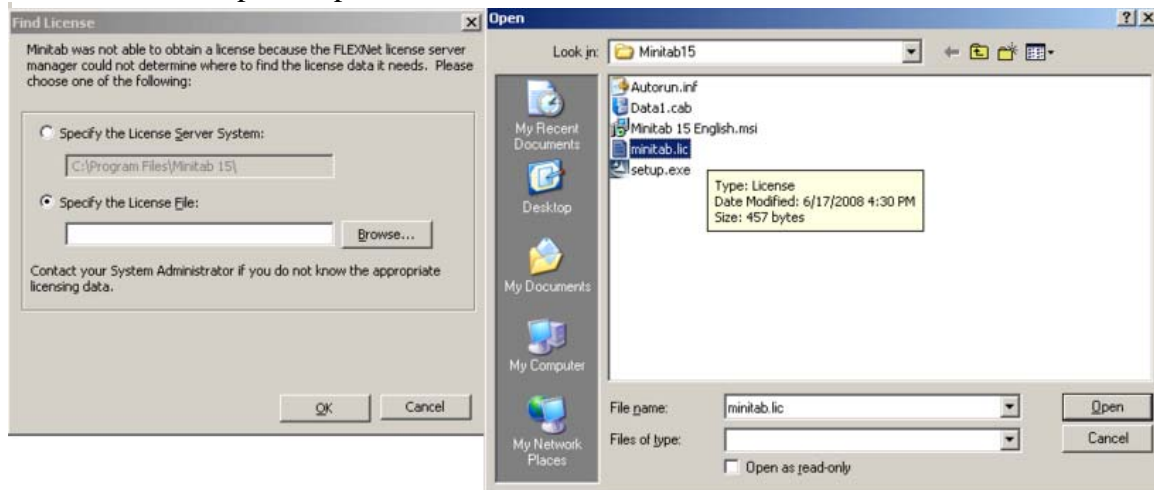

8) You should now be able to click Start > All Programs > Minitab Solutions > Minitab 15:

When you launch Minitab for the first time, it will ask you about the License:

9) You should select the second radio button (“Specify the License File”) and then browse to the first folder that was created during this download process and select “minitab.lic” and press Open.

10) The path name should now appear in the Specify the License File box. Press OK and Minitab 15 should be up and running. You will not have to repeat this process again.
